(57) **ABSTRACT**

An online compliance engine stored on a computer readable storage medium includes an intercept module programmed to intercept a request by a client for content on a destination server, and a compliance module programmed to access and parse the content from the destination server requested by the client, and to determine whether or not the destination server is authorized to distribute the content, the compliance module being further programmed to allow the destination server to distribute the content to the client if the destination server is compliant, and to block the destination server from distributing the content if the destination server is not compliant. The engine also includes a billing module programmed to bill the destination server if the content is distributed to the client.
